REDACTED VERSION

February 5, 2003

Gregg A Cooke, Administrator
Environmental Protection Agency, Region VI
1445 Ross Avenue, Suite 1200

Dear Mr. Cooke:

I have received a copy of John Zent's of January 27, 2003. As you might imagine I view the issue in a somewhat different light.

I will not dispute what Burlington does or does not own. I will state that their signs were on the fenced area of both of my reported properties that they have described as Section 1 and Section 3.

I have no record of any response on this contamination issue from Burlington. If they have sent a response I would very much appreciate a copy. I did meet with Burlington on numerous occasions and furnished the exact same CD to them as I did to your organization. I believe the specificity of the CD addresses location and claims.

Since I reviewed Mr. Tutchton's letter before it was sent, I can see no place where he "was not informed". What I do see is a lack of this Industry stepping up to the plate, whether it is contamination issues or surface damages.

Mr. Zent and I have a long-standing relationship and difference on issues. The letter was sent to resolve some of these issues, because to date, I am not certain whether there is or is not a contamination issue. I would hope the EPA could resolve this issue.

If EPA chooses to investigate this problem, I would request that you would avail your personnel to commit additional time, because we have several more sites we would like included.

Sincerely,

(b) (6)
